

## Magnetic Clamping Ball

Magnetic Clamping Sphere is a switchable permanent magnet which allows for flexible clamping especially in laser welding plant. A switchable permanent magnet, for clamping the work piece, is built into a spherical housing which allows for any kind of pivoting or turning movement plastic shell, strong magnets with 100 N/CM<sup>2</sup>.

### Feature:

- Stable clamping and easily used.
- Increase the welding efficiency a lot.
- Plastic shell, long life span.
- Strong adsorbability with non-slip base.

Ball-Φ	Magnetic-Φ	Weight	Color
140mm	100mm	5kg	blue or black
165mm	125mm	9kg	blue or black
200mm	160mm	20kg	blue or black
